

GLOBAL HF RADAR NETWORK

Thailand HFR Network

Status (April 2021)

- 176 stations reporting in Region 2 and 38 stations in Region 1 reporting data in real-time.
- 140 radars operating in Asia and Oceania

Recent Achievements

- The European Node is running operationally for centralizing a standardized and qualified data management in Europe, connected to the Global Network (ingestion of US data started in 2020).
- Radiowave Operators Working Group (ROWG) held virtual meeting Nov. 17-18, 2020. Participation from 11 Regional Associations in US IOOS and 13 other countries.
- The annual meeting of HFR user communities in Japan was held in December 2020 in Fukuoka

Foci for the Year 2021

- Transition operations to ITU frequency bands
- Identify and communicate frequency issues to the competent authority
- Work with for OceanOPS for integrating Global HFR Network in their monitoring.
- Continue discussions with Ocean Best Practices

REGION 1 (EUROGOOS)

REGION 2 (US and Canada)
